Marshall Engines will, at its sole discretion, repair or replace defective parts or a complete engine. Use good quality motor oil of the appropriate grade and viscosity as recommended by the original engine manufacturer. After initial startup, avoid lugging or extended speed in excess of 55 m.p.h. for the first 500 miles. Engines overheating and engine failure due to the lack of lubrication can be prevented by adequate monitoring of all gauges or lights and should never in the absence of neglect by the purchaser result in engine damage.
